Objective

Seeking a job opportunity as .Net Developer that has daily challenging tasks in one of the cutting-edge market technologies which in turn gives me the ability to develop and produce promising applications.

Professional Experience

- | | |
|----------------------|--|
| Apr 2021 to Now | Backend .NET core developer at Tribal.Credit
Heliopolis, Egypt.
Industry: Finance. Team size: 11-50 employees
Investigating and studying the existing system to work on the refactoring part of the system migrating it to .net 5. |
| Mar 2020 to Sep 2020 | Backend .NET core developer at Electrified
Nasr City, Egypt.
Industry: Software house. Team size: 1-10 employees
developed backend modules using .net core and EF core with MSSQL to be added to the system |
| Jan 2020 to Mar 2020 | .NET developer at Smarttechsys
Nasr City, Egypt.
Industry: Software house. Team size: 10-50 employees
developed some WPF activities to be added to IRobo system which an RPA using C# WPF, class library .net framework 4.6, and extracting and disassembling some DLLs of RPA activities to be encrypted. |

Internships

- | | |
|-----------------------|--|
| DEC 2020 to Apr 2021. | .NET Full Stack Track
Information Technology Institute (ITI)
Courses: C# OOP HTML5 CSS3 Bootstrap Java Script ES6 MSSQL Entity Framework Ado.NET ASP.NET Framework ASP.NET Core WEB API 2 Web API Core Angular 2+ |
|-----------------------|--|

Education

Sep 2014 to June 2018

BSc in Computer Science

Fayoum University / Faculty of Computers and Information.

Grade: Very Good

Graduation project:

Title: Aklni

Grade: Excellent.

Technology stack: C#, .net framework 4.5, MSSQL, EF, JS, jQuery, and Dynamics CRM

SKILL Summary

Technical:

- **Back-end development:** ASP.NET framework, ASP.NET Core (MVC and API).
- **Front-end development:** HTML5, CSS3, Bootstrap, and fair knowledge of JavaScript, jQuery, Ajax, Angular2+.
- **Programing languages:** C# - basics of Java SE - python.
- **Database:** Microsoft SQL Server
- **ORM:** LINQ, Ado.net, Entity framework (EF6 and EF core), and Dapper.
- **SVC:** Git with GitHub, GitLab, and Bitbucket.

Conceptual:

- Good understanding for Object Oriented Analysis and Design
- SOLID and Design Patterns.
- TDD and helicopter view about the DDD.
- Good background Software engineering, System analysis.

Languages:

- Arabic: Native
- English: Professional working proficiency

Projects:

EV Platform:

E-commerce system built upon Virto E-Commerce CMS for selling EV cars and its accessories.

Technology stack: DDD with .net core 3.1, .net EF core 3.1.7, SQL Server database, Angular, Liquid.net.

IRobo:

An RPA project which automates the boring stuff and the daily or any process need to be done.

Technology stack: C#, WPF, Class Library, .net framework 4.6.

Aklni:

An e-commerce system that provides opportunities to housewives to create a small business selling their homemade food through this system.

Technology stack: C#, .net framework 4.5, MSSQL, EF, JS, jQuery, and Dynamics CRM
